

Build a Simple Calculator API using Node.js and Express.js

Step 1: Install Node.js

Download and install Node.js from <https://nodejs.org>

Step 2: Create Project Folder

Run commands:
mkdir calculator-api
cd calculator-api

Step 3: Initialize Project

Run:
npm init -y

Step 4: Install Express

Run:
npm install express

Step 5: Create server.js

Add the following code:

```
const express = require('express');

const app = express();

app.get('/add', (req, res) => {
  const a = parseInt(req.query.a);
  const b = parseInt(req.query.b);

  res.json({
    result: a + b
  });
});

app.listen(8080, () => {
  console.log('Server running on port 8080');
});
```

Step 6: Run Server

Run:
node server.js

Step 7: Open Browser

Open:
<http://localhost:8080/add?a=10&b;=20>

Expected Output

```
{"result":30}
```

Spring Boot vs Node.js

Spring Boot	Node.js
Java based	JavaScript based
Enterprise applications	Lightweight APIs
Multithreading	Event-driven
More configuration	Simple setup
